

ESCMID Study Group for Veterinary Microbiology (ESGVM)

The new home for veterinary microbiologists within ESCMID

Mission & Objectives

- Contribute to advancement and harmonisation of methods for diagnosis and antimicrobial susceptibility testing (AST) of veterinary pathogens
- Foster research aimed to optimise formulation and dosing regimens of veterinary anti-infectives to improve clinical efficacy and reduce resistance development
- Support and divulge antimicrobial stewardship and best infection control practices in veterinary medicine
- Set the basis for the creation of a European network for surveillance of zoonoses and antimicrobial resistance in animal populations and for early detection of new or exotic infectious agents using animals as sentinels of human disease
- Provide a joint European forum for veterinary microbiologists working in research, public health and animal health care, including both public and private organisations
- Promote One-Health by facilitating joint research and training collaborations between medical and veterinary microbiologists within areas of common interests (e.g. zoonoses and antimicrobial resistance)
- Offer advice to European agencies (EMA, EFSA and ECDC) on topics related to control and prevention of veterinary and zoonotic infections
- Provide actions in order to promote awareness of neglected (underdiagnosed) zoonotic infections in human medicine

Steering Committee (ad interim)

CHAIRPERSON

Professor Luca GUARDABASSI

Faculty of Health and Medical Sciences, University of Copenhagen, Denmark

E-mail: lg@sund.ku.dk

SECRETARY

Dr Cindy Maria DIERIKX

Central Veterinary Institute, The Netherlands

E-mail: cindy.dierikx@wur.nl

TREASURER

Professor Dik Johan MEVIUS

Central Veterinary Institute, The Netherlands

E-mail: dik.mevius@wur.nl
