About ESGITM

The ESCMID Study Group on Infections in Travellers and Migrants promotes collaborative research to obtain multi-centre data on the epidemiology, clinical presentation and prevention of travel-related infections. The group takes a multidisciplinary approach to the management of infections in travellers and immigrants, offering advice for travellers’ and promoting awareness of the importance of travel- and migration-related infections in scientific community, public and among other stakeholders.

Publications

• ESGITM-ESGCIP. Management of infections in critically ill returning traveller in intensive care units (submitted to IJID).
• ESGITM-ESGICH. Consensus document. Recommendations on travel medicine and management of endemic diseases in solid organ transplant recipients.

Projects

• Research project on dynamics of travel related infections
• Writing a guideline for migrant health
• Evidence-based guidance on screening for infectious diseases among migrants to the EU/EEA

Activities

• EACID 2014, 24-27 September 2014, Belgrad, Serbia.
  • Symposium: Infections in travelers.
  • Keynote lecture: Ebola Hemorrhagic Fever.
• EACID 2015, 30 September- 3 October 2015, Tbilisi, Georgia.
  • Symposium: Prevention of travelers’ infections
  • Meet the expert: NDM-1 spread by travelers
