Transportation to Ondokuz Mayıs University

Samsun, Turkey

Turkey's most developed city in the north of the Black Sea. The city has an air and a sea port. Every day Ankara, Istanbul, Izmir, Antalya flights are available. The city's population is 500,000 in the center and a total of 1,200,000. It often features a rainy climate except summer. Parallel to the sea, with a long coastline the city has large park areas open to the public, including the Western and Eastern Park. Youth and public concerts are held during the summer months in these parks. Especially sports activities and socio-cultural activities are available to meet all your needs.
