

# Infectious Diseases Service

## University Hospital of Lausanne, Switzerland

### Institution and Service

The University Hospital of Lausanne (CHUV) is a 850-bed tertiary care medical centre located in western Switzerland.

The Infectious Diseases Service includes:

- 1) a **14-bed hospitalization ward**, specialized in the care of patients requiring **protective isolation** for either **infectious diseases** (such as tuberculosis and emerging infectious diseases) or **intensive chemotherapy** for hematological malignancies (such as acute leukemia and autologous hematopoietic stem cell transplantation).
- 2) an **in-patient consultation service** for **general infectious diseases** and for specialized consultations for **infections in solid-organ transplant recipients**, **septic surgery** (including bone and joint infections), **HIV-infected patients** and **pediatric infectious diseases**.
- 3) an **outpatient clinic** providing care for **HIV-infected patients** and specialized consultations in the area of **infectious diseases**, **travel medicine** and **vaccinology**.

We also have daily meetings with clinical microbiologists and infection control specialists.

### Medical Team

#### Infectious Diseases Service

 Prof. Thierry Calandra Head of the Infectious Diseases Service	 Prof. Blaise Genton Vaccination Center and Travel Health Unit	 Dr. Pierre-Yves Bochud Isolation Ward Unit	 Dr. Matthias Cavassini Outpatient Clinics	 Dr. Oriol Manuel Transplant Infectious Diseases	 Dr. Thierry Roger Laboratory of Infectious Diseases
 Dr. Noémie Bollat Cheffe de Clinique Outpatient antibiotic therapy	 Dr. Frédéric Tissot Chef de Clinique	 Dr. Katherine Darling Cheffe de Clinique Research	 Dr. Cathy Voide Cheffe de Clinique	 Dr. Julie Delaloye Cheffe de Clinique	 Dr. Laurent Merz Chef de Clinique
 Dr. Anne-Sophie Brunel Cheffe de Clinique					

#### Institute of Microbiology and Infectious Diseases Service

 Prof. Gilbert Greub Head of the Institute of Microbiology	 Prof. Pascal Meylan Clinical Virology	 Dr. Frédéric Lamoth Clinical Mycology
---	---	---

#### Infection Control and Infectious Diseases Services

 Prof. Giorgio Zanetti Head of the Infection Control Service	 Dr. Laurence Senn Associate physician
---	---

#### Pediatric Infectious Diseases

 Dr. Sandra Asner Pediatric Infectious Diseases
--

### ESCMID Observership Program

#### For up to one week

We will introduce the observer to the Infectious Diseases Service, present our organization and illustrate our areas of interest.

The observer can then select a clinical program related to a specific area of interest namely: **general infectious diseases**, **infections in onco-hematological patients**, **transplant infectious diseases**, **septic surgery**, **pediatric infectious diseases**, **travel medicine** and **vaccination centre**.

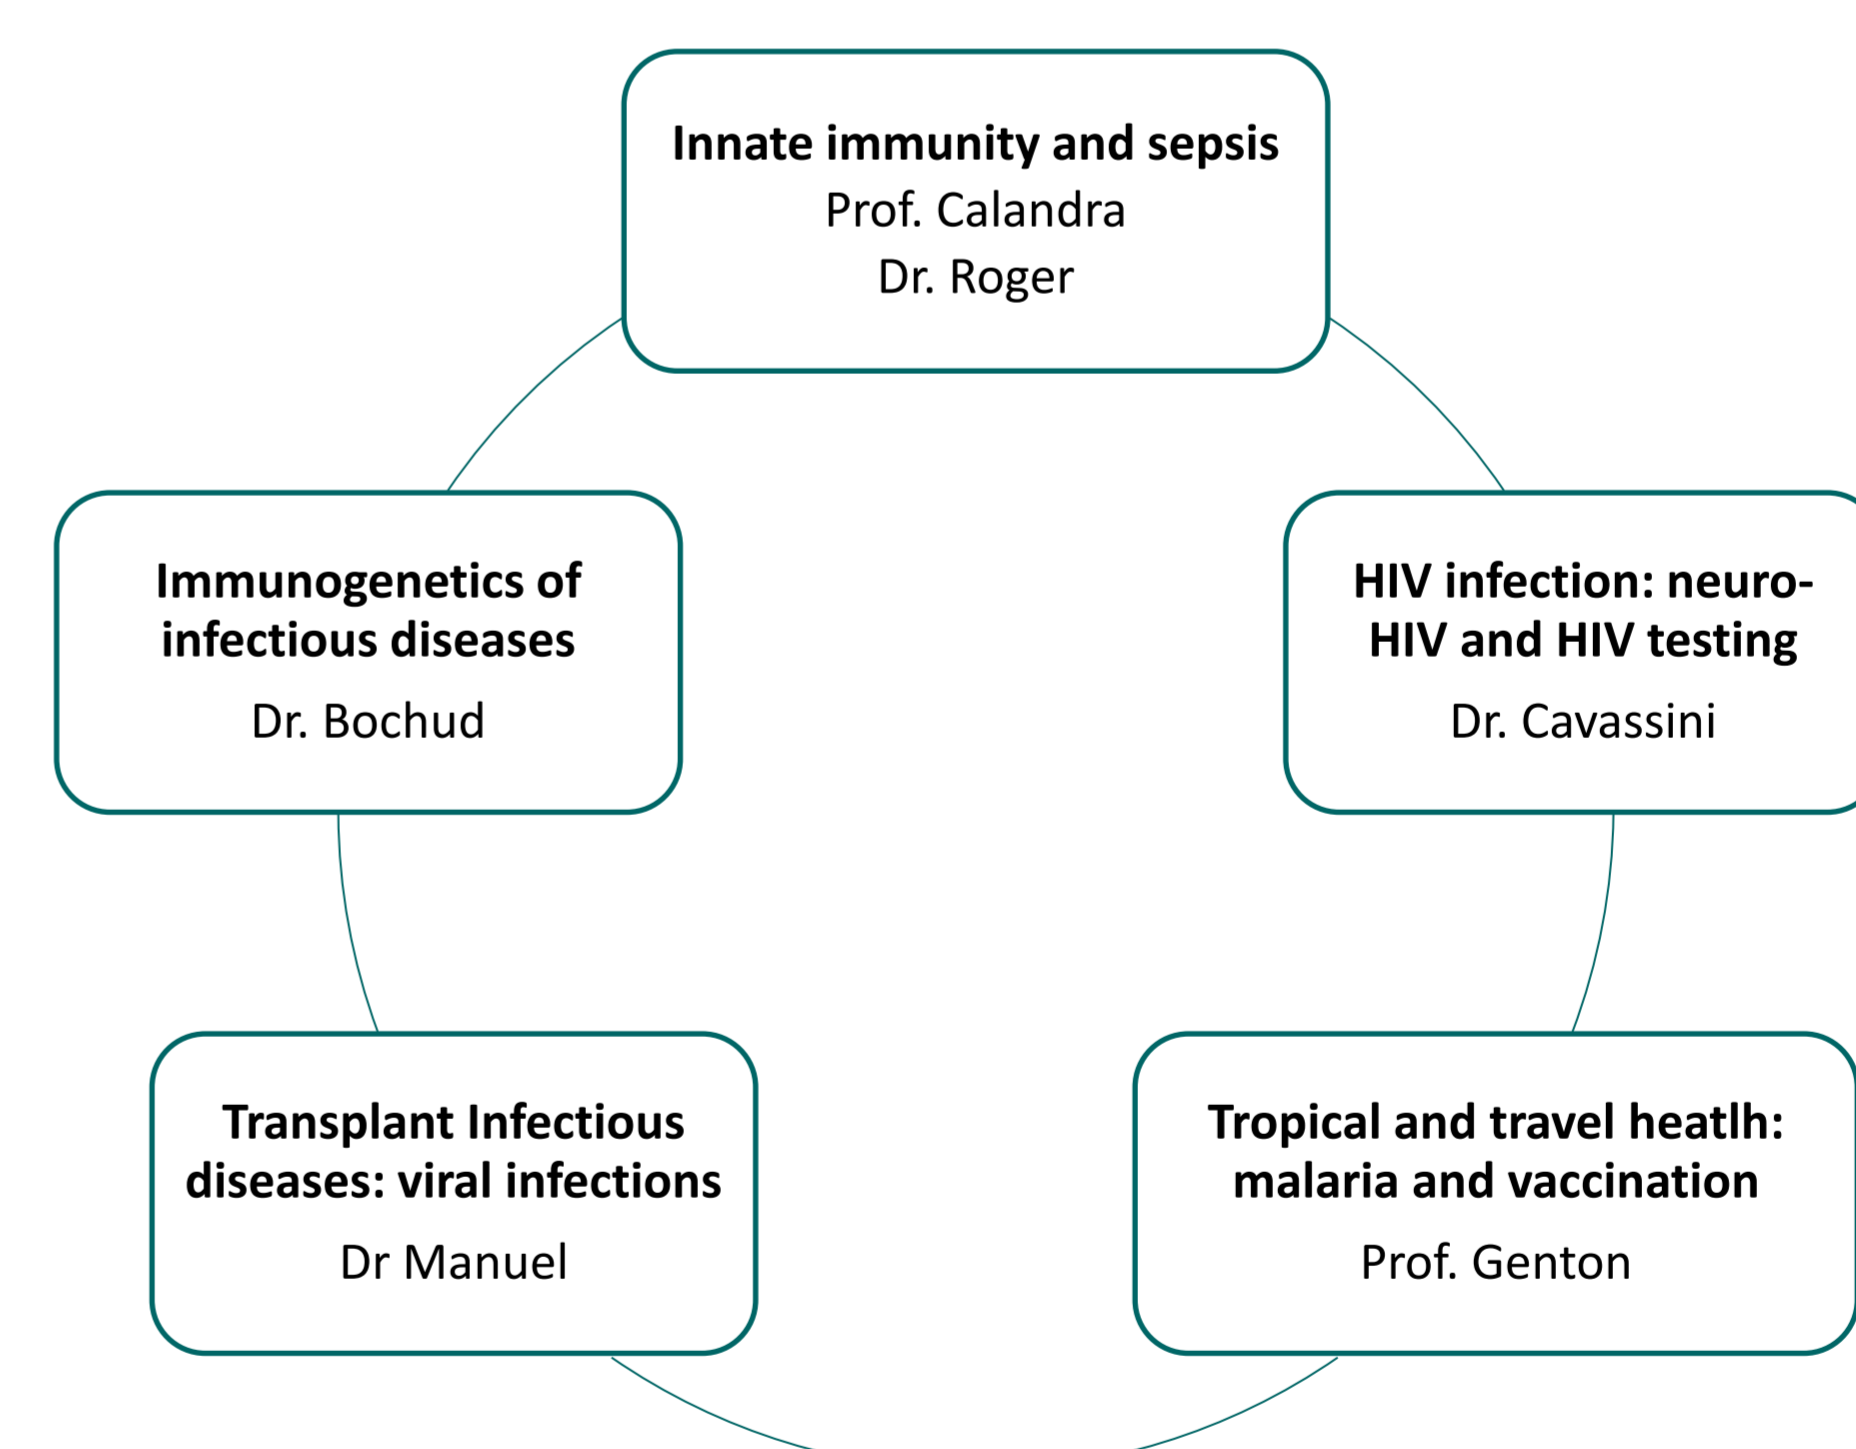

The program is designed to provide a maximum of opportunities to learn and discuss clinical work and competences: priority is given to clinical activities (e.g. rounds, inpatient consultations, interdisciplinary meetings with other specialists), with a 1:1 supervision by physicians with expertise in the selected area of interest.

Beyond the individual program, it is expected that the observer participates in the common activities of the Infectious Diseases Service (daily microbiology meetings, weekly conferences).

#### For up to one month

The observer can then select two different clinical programs related to a specific area of interest described above. In addition, there will be an opportunity to interact with research teams in **Infectious Diseases**, **Clinical Microbiology and Infection Control**. The observer may acquire specific skills in the microbiology laboratory (e.g. molecular techniques, clinical bacteriology, clinical mycology).
