European Training Programme

The EUCIC Infection Prevention and Control Certificate

About EUCIC’s training programme
The spread of infectious diseases in a tightly connected world, along with increasing numbers of multidrug-resistant organisms, represent challenges that can only be met by increasing commitment to infection prevention and control (IPC). Conversely, training opportunities and IPC qualifications are still scarce. Europe’s approach to IPC is still very heterogeneous among different countries and sometimes also among different healthcare settings within the same country. However, every country has a certain expertise and/or specialty to offer. The mutual exchange of knowledge between European institutions provides a unique perspective on IPC, resulting in a unique European competence. Based on this perspective and competence, a specific educational programme was developed to train a new generation of IPC specialists by EUCIC.

Organizers
European Committee on Infection Control (EUCIC) of the European Society of Clinical Microbiology and Infectious Diseases (ESCMID)

Programme structure
• The first training programme in infection control running in multiple excellence centres across Europe!
• E-Learning modules
• Interim tests and a written final examination

Programme details
• Medical doctors and pharmacists, nurses or other healthcare professionals with an MSc or PhD are eligible
• ≈ 60 ECTS after completion
• 2-year programme
• Every year, the best performing graduate receives a full tuition refund

Tuition
• Full programme – no ESCMID member: 5,000 EUR
• Full programme – ESCMID member: 4,700 EUR
• Full programme without the basic module: 4,200 EUR

Registration
Register now online on the ESCMID website at: www.escmid.org/research_projects/eucic/training_programme/
