Trainee Association of ESCMID (TAE)

Current members of the TAE steering committee

ESCMID • MANAGING INFECTIONS • PROMOTING SCIENCE

European Society of Clinical Microbiology and Infectious Diseases

1 What is TAE?
A group of trainees and young specialists in CM and ID. We have 7 steering committee members and many representatives from different countries forming a large network of young enthusiastic people to organize activities under the wings of ESCMID.

2 What do we do?
One of the goals of the TAE is to take training in CM and ID to new heights. By using international resources we can discuss optimal training programmes, have international trainee courses with respected speakers and learn from each others’ regional specialties. By creating a large network of young professionals in CM and ID, a door is opened for better trans-European collaboration and effective use of resources.

3 Objectives:
- To recognize and interpret challenges trainees of CM and ID face throughout Europe
- To implement harmonized content and quality of CM and ID training and European Curricula across Europe
- To generate a broader and inter-related collaboration of CM and ID trainees across Europe by using a regional and worldwide network of CM and ID trainees
- To stimulate exchange programs across Europe and beyond European borders
- To provide a programme which meets the specific needs of CM and ID trainees at each ECCMID
- To plan ECCMID sessions and outside ECCMID activities with other Study Groups.
- To create future partnerships for TAE own research studies

4 Future plans
- Further increase our international network
- Strengthen the collaboration with medical students
- Continue research projects that are related to trainees and young scientists in particular
- Organize educational programmes and other postgraduate educational courses throughout the year

Stay updated at all times!

5 What to do during ECCMID 2018?:
Join us on Trainee day on Saturday April 21st!
- We organize round table sessions with experts to learn about options in career, to think about possibilities and to get inspiration from experts who were once in the same position. At the same time, this will be a perfect opportunity to build strong links between senior experts and future professionals.
- Attend ESCMID Young Scientist Reception directly after Trainee day
- Attend “Career development for the next generation of CM/ID professionals” on Tuesday April 24th at 13:30h

6 Want to get involved?
- Use your ESCMID membership to participate, make suggestions and ask questions
- Are you a trainee in CM or ID or have you finished your specialization of CM/ID less than 3 years ago? Would you like to join as a representative for your country? Don’t hesitate to contact one of the TAE steering committee members
