

## **Future peer-to-peer events**

### ***Online platform***

An online chatroom will be created to facilitate Q&A and discussions with IPC experts.

### ***Virtual roundtables***

On a regular basis, experts will be recruited around a specific topic, and participants will have the opportunity to choose an expert based on its background and expertise field prior to the event. Then breakroom will be formed, gathering an expert, who will also be a moderator, and 8 to 10 participants per breakroom. The purpose of the virtual round table session is to give IPC professionals the chance to talk to experts in an informal setting. We wish to create a moment dedicated to exchange between peers to share experiences and problematics, hoping that it will help professionals to find answers and guidance for their practical questions.

### ***Peer-to-peer group-discussion forums with expert participation***

Partners will be grouped by ¼ areas in Europe (related culture, language), resulting in four groups. Every group discuss the same challenge and meet on a regular basis, to be agreed upon at the first meeting. Every group will have a chairman, leading the meeting and in charge of the agenda, and one person will be in charge of the minutes from every meeting, which will lead to a draft position paper.

For each topic, a position paper will be developed with input from all four areas. Topics will be based on suggestions from partners and answers from the Need Assessment Questionnaire.
