QUALITY ASSURANCE
for > 300 microbiology, virology
and parasitology
laboratories in Bulgaria

Training courses
1. New developments in clinical microbiology diagnostics
2. Genetic and molecular methods for diagnostics and typing
3. Antimicrobial chemotherapy
4. Etiology and therapy of invasive and skin mycoses
5. Diagnosis and treatment of immunocompromised patients
6. Enterocolitis syndrome
7. Legionella and legionellosis
8. Staphylococcal and streptococcal infections
9. Microbiological diagnosis of diphtheria
10. Highly dangerous bacterial pathogens
11. Microbiological diagnosis of tuberculosis
12. Vector-borne pathogens

17-19 May 2017, Sofia
15th National Congresses
of Clinical Microbiology
and Infections
Organized by Bulgarian
Association of
Microbiologists
www.bam-bg.net/congress

BAM is a member of:
- ESCMID - European Society of Clinical Microbiology and Infectious Diseases
- IUMS – International Union of Medical Societies
- UBMS – Union of Bulgarian Medical Specialists

18 November
The European Antibiotic
Awareness Day
Initiatives every year are
organized by Bulgarian
Association of
Microbiologists

Bulgarian Association of Microbiologists (BAM)
www.bam-bg.net

- Microbial drug resistance
- Respiratory tract infections
- Food- and water-borne infections
- Sexually transmitted infections
- Zoonoses with epidemic risk
- Vaccine-preventable infections
- Vector-borne infections
- Invasive and skin mycoses
- Infections in surgery and pediatrics
- Nosocomial infections
