About the Society

The vision of the Infection Prevention Society is that no person is harmed by a preventable infection. The mission is to inform, promote and sustain expert infection prevention policy and practice in the pursuit of patient or service user and staff safety wherever care is delivered.

Our membership includes infection prevention and control practitioners from a variety of disciplines including medical microbiologists and nurses. There are also categories for corporate members, institutional members and associate membership.

Our Strategic Plan for 2017 – 2020

- Provide high quality resources, education and networking opportunities to enhance members’ ability to provide effective infection prevention and control services
- Define the professional attributes, knowledge and skills required by infection prevention and control practitioners to progress along a career pathway
- Establish and maintain a credentialing process for professionals in infection prevention and control
- Promote the principles and practice of infection prevention and control to patients, the public, and those working in health and social care
- Support and contribute to the generation and dissemination of knowledge from research and implementation that enriches the practice of infection prevention and control
- Support international outreach activity to promote the principles and practice of infection prevention
- Be recognised as an authoritative voice on infection prevention and control to patients, the public, health and social care professionals, healthcare industry and policy makers
- Operate a robust governance structure that enables charitable aims and objectives to be achieved

Infection Prevention 2017 aims to bring together infection prevention and control professionals from across the world to share and debate best practice, research and discuss issues within the infection prevention field.
