COVID-19: A question-based discussion on treatment

Thursday 28th May 2020, 18:00 Central European Summer Time

18:00-18:05 Welcome and Introduction
Maurizio Sanguinetti (Università Cattolica del Sacro Cuore, Rome, Italy)

Moderators: Jesús Rodríguez-Bañó (Hospital Universitario Virgen Macarena, Seville, Spain),
Annelies Zinkernagel (Universitätsspital Zürich, Switzerland)

18:05-18:25 Jose R. Arribas (Hospital La Paz, Madrid, Spain)

1. Which criteria would you use to hospitalise a patient with a positive PCR for SARS-CoV-2?
2. What antiviral treatment (if any) would you provide to a patient admitted with COVID-19 pneumonia? What variables would you consider for your decision?

18:25-18:35 Q&A

18:35-18:55 Antonella D’Arminio Monforte (University of Milan, Italy)

3. How would you follow-up COVID-19 patients? Which clinical data and laboratory tests would you do and with what frequency?
4. Would you consider the use of anti-inflammatory/immunosuppressive drugs? Which ones? In which situations/patients?

18:55-19:05 Q&A

19:05-19:10 Conclusions
