ESCMID Study Groups

30 May 2019

Invitation to submit a specific advanced module for the European training programme leading to EUCIC’s Infection Prevention and Control Certificate

Dear colleague,

EUCIC is opening the selection process for a new excellence center to be included in the European training programme resulting in the EUCIC’s Infection Prevention and Control Certificate.

The center should organize the advanced module between May and October 2020.

The list of topics to be covered by this specific module are:

**Area 9 – Surveillance**

- Differences between hospital acquired infection (HAI) surveillance definitions and clinical definitions for infectious syndromes
- The role of surveillance and feedback (prospective, benchmarking) reporting
- Surveillance systems (local, regional, national, European and global)
- Use data management resources to obtain needed information and perform healthcare epidemiology and public HAI surveillance
- Validation of HAI surveillance data
- Proper selection of HAI surveillance software
- Surveillance in special areas
- Surveillance in the intensive care unit
- Surveillance of surgical site infections
- Surveillance of Clostridium difficile infections
- Surveillance of antimicrobial resistance
- Surveillance of antimicrobial consumption
- Performing point prevalence surveys of HAI and antimicrobial use
- Comparison of surveillance data across institutions/ settings and against population-based data sets

**Submission deadline** 30 June 2019
