Rules for authorship and publications in EUCIC projects

EUCIC Publication Policy 1.0
Date of issue: 21 March 2016
Issued by: Publication Committee
Citation of EUCIC documents

The copyright of all documents and data published on the EUCIC website remains with EUCIC. All are freely available for re-use if reference to the EUCIC website is given and documents and data are not resold. Any secondary publication of the data must be referenced with the declaration that "These data have (or this document has) been produced by EUCIC and made available at no cost by EUCIC and can be accessed freely on the EUCIC website https://www.escmid.org/eucic/. EUCIC recommendations are frequently updated and the latest versions are available at https://www.escmid.org/eucic/. EUCIC documents published on the EUCIC website should be cited in the following way: European Committee on Infection Control. Name of document, EUCIC version number, year. Website address. These publication policies should be cited as: “EUCIC Publication Policies. European Committee on Infection Control. EUCIC Publication Policies v1.0 2016. https://www.escmid.org/eucic/".
Publication policy and authorship rules

1. In publications related to projects that run through the EUCIC network, all individuals who contributed substantially to the project will be acknowledged as author. In detail, authorship credit is based on 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet all three conditions.

2. In publications related to projects that run through the EUCIC network all individuals who provided data for projects will be, whenever possible, included by a group name (e.g. EUCIC Network) or listed as investigators by a group name (e.g. Implementation-Working Group), with the names of individuals.

3. In publications related to data that were collected e.g. in multi-center projects that run through the EUCIC network, a publication committee will be composed. The committee has the task of guarding the EUCIC authorships rules on publications, organize all dissemination activities and co-authorships. The publication committee comprises of the EUCIC Chair, the EUCIC scientific coordinator and two members of the EUCIC advisory board.
   a. EUCIC Publication policies include rules for all presentations, abstracts, scientific publications, seminars, press releases or other dissemination activities. Typically, local sites are allowed to publish analyses of their site-specific and their common data. It is collegial courtesy to inform other study investigators of these activities.
   b. Publications that use pooled data need special consideration. All such publications must go through approval and follow the process established by the publications committee. The democratic approach is to allow all investigators to provide ideas for analyses of the common data, and allow all to have the possibility of working on a manuscript proposed by others.
   c. Definitions of 'actively,' 'substantive,' and 'intellectual' contributions are usually specified by the publications committee, and involve more than revising drafts for grammar and typographical errors, for example.
   d. When data are collected at many sites and in different countries, it is typically expected that all manuscripts would have representation at least from each country, but the method suggested above does not guarantee this. The above method implies that each investigator needs to earn co-authorship in every manuscript.
   e. The group should jointly make decisions about contributors/authors before submitting the manuscript for publication. The corresponding author/guarantor should be prepared to explain the presence and order of these individuals. It is not
the role of editors to make authorship/contributorship decisions or to arbitrate conflicts related to authorship.

Acknowledgements

The publication policies were written by N.T. Mutters, the Scientific Coordinator of EUCIC. We would like to thank Hub Wollersheim that he allowed us to use ideas formulated in his paper “Publication and authorship rules in multi-center studies”.
